INDIA'S LEADING PUBLIC HEALTH NETWORK FOR COVID-19 RESPONSE

A Brief Introduction of CHD Group:

Born in 2014, CHD Group is India's leading public health network of physicians, public health professionals, social workers, and corporate volunteers having the vision to build affordable and accessible healthcare for India and the rest of the world.

Within a span of 7 years, CHD Group has cut across impact touching over three million lives and counting, having worked in primary healthcare, COVID-19 humanitarian crisis response, disaster management, women's health, and social protection of communities. CHD has aided Governments in provided technical support to handle surge capacities around the country. CHD Group works with Government Departments, United Nations Agencies, and Corporate Companies in nurturing a healthy world for all.

About Our Project:

No oxygen, no beds, no vaccines and no food marks the tragic development of India's gasping COVID-19 story.

India has recorded the world's highest spike in cases over the last few weeks, with 54% cases from five states- Karnataka, Maharashtra, Uttar Pradesh, Gujarat and Kerala.

This surge is expected to peak mid-May with the count of cases reaching half a million and Karnataka likely to be the worst hit. As cases have soared, hospitals are running out of oxygen supplies, allowing only people with higher connections to get life-saving treatment.

Meanwhile, the vulnerable population is relying heavily on overcrowded free government hospitals where beds are running out, creating chaotic and devastating scenes.

In this state of emergency, help us deliver our relief efforts through Mobile Healthcare, vaccination, relief materials, and medical supplies.

Your small donation can help us mobilize:

- Mobile Medical Units providing lab services and doorstep doctors' service with medicines for mild and moderate COVID-19 management.
- Oxygen cylinder purchase and delivery.

- Transportation of patients to facilities where care is available.
- Vaccination drives for vulnerable population
- Dry nutritious food supply in lockdown areas to mitigate hunger and prevent malnutrition.
